

**PACKAGING CELL LINE FOR DIPHTHERIA TOXIN EXPRESSING NON-
REPLICATING ADENOVIRUS**

Abstract of the Disclosure

5 The invention provides a packaging cell line for production of diphtheria toxin (DT) expressing, non-replicating adenovirus for use in suicide gene therapy of cancer cells, as well as production of immunotoxins. Also provided are methods for producing diphtheria toxin (DT) expressing, non-replicating adenovirus, methods for producing immunotoxins, and adenovirus and immunotoxins produced by those methods. Further provided are
10 methods for making a cell resistant to diphtheria toxin.
